

FNP Sales Analysis: Insights Summary

Ferns & Petals gift orders, 2023 | Excel, Power Query, Data Model, Pivot Tables, Slicers | By Nupur

1,000 Total Orders	\$3.52M Total Revenue	\$3,520.98 Avg. Order Value	5.53 days Avg. Delivery Time
-----------------------	--------------------------	--------------------------------	---------------------------------

Objective and Data

Objective: understand FNP's sales trends, customer behaviour and product performance, and suggest how to grow sales and improve delivery.

Data: 3 linked tables (Orders, Customers, Products), 1,000 orders from January to December 2023.

Cleaning: many order and delivery dates had day and month swapped, giving negative delivery times. I tested both readings of each date and kept the one with delivery 0 to 15 days after the order. All 1,000 rows had exactly one valid reading.

Key Insights

Monthly trend	Revenue peaks in February (~\$710K, Valentine's) and August (~\$740K, Raksha Bandhan). April to July is the slow period (~\$140K to \$160K a month).
Occasions	Anniversary earns the most (~\$670K), then Raksha Bandhan (~\$630K). Diwali is the lowest (~\$310K).
Why Diwali is low	Only 95 orders (9.5% of total) and 7 different products. Order size (avg. qty 3.13) and delivery speed (4.95 days) were normal, so the gap is order volume.
Categories	Colors is the top category (~\$1M, about 28% of revenue), followed by Soft Toys (~\$740K) and Sweets (~\$730K).
Top 5 products	Magnam Set \$121.9K, Quia Gift \$114.5K, Dolores Gift \$106.6K, Harum Pack \$101.6K, Deserunt Box \$97.7K. Best product: Magnam Set.
Customers	Orders are split almost evenly: 51% men, 49% women.
Top cities	Imphal, Dhanbad and Kavali are among the cities with the most orders (about 27 to 29 each).
Day and time	Tuesday and Sunday bring the most revenue; Wednesday and Thursday are the weakest. Hourly revenue stays between ~\$100K and ~\$225K, with no single dominant hour.
Delivery time	Averages 5.53 days (range 1 to 10). Order quantity has no effect on delivery time (correlation about 0.00).

Recommendations

- **Run offers in the slow months** (April to July) with discounts or new occasion bundles.
- **Stock early for Anniversary and Raksha Bandhan**, the highest-earning occasions.
- **Boost Diwali** with festive hampers, a wider product range and an earlier campaign.
- **Time promotions by day:** use Tuesday and Sunday for campaigns, and mid-week deals for the weaker days.

Data Dictionary (Orders table)
